 [Re: Abbott gets 6 Month Lupron Approval](#)

Well now that Lupron has 6 month dosing the fat lady has sung for Trelstar. We never could compete here and now ALL bets are off. We will be blown out of the LHRH market completely. I surrender. I give up, I am out of here. Watson can never compete with the big boys and we are SO over.

The Fat Lady not only sings for Trelstar...she sings for Watson. This place is doomed and we all know it. I have been on 3 interviews a week for the last 4 weeks and something will break soon. That will be one of the happiest moments of my life.

 [Re: Abbott gets 6 Month Lupron Approval](#)

I have never read such stupid, idiotic drivel in my life. This is worse than reading comic books. Where do you people get your info, ideas, etc. Obviously someone who knows nothing about selling products, competition, FDA, lhrh market, historical information, etc. Now I realize why I visit Cafepharma every 4-6 months. Too much nonsense and bull\$\$\$.

 [Re: Abbott gets 6 Month Lupron Approval](#)

They promised me that Trelstar's 6 month formula was going my ticket to success. Now I find out that Lupron beat us to market. Did I get sold a bill of goods?

Maybe I am missing something. How did Lupron beat us to the market? They simply filed. Are you that stupid? If so, perhaps you need to get a job at a car wash or somewhere that does not require that you know how to read or analyze information. I can't get over how stupid you are.

This is no joke. I work for Abbott and we do have 6 month Lupron ready to promote to all Uros and Oncs. We will wipe the floor with Trelstar because the docs know who has buttered their bread, and we got very deep pockets. So. good luck, good selling, and see you losers begging for a crumb.

Gee. You sound EXACTLY like the Watson Loser with the Turd in His Back Pocket! Are you his twin? Or does Abbott also hire from Community Colleges where they forget basic English and write sentences like...

'So. good luck...??'

I think Abbott has higher standards, Loser/Turd.

RELATED NEWS

Stocks Post Strong Gains Following Late-Session Rally - U.S. Commentary
(RTTNews) - Abbott Laboratories (ABT: News) Thursday said the U.S. Food and Drug Administration has accepted for review the supplemental new drug application of a new six-month 45-mg formulation of Lupron Depot for use in the palliative treatment of advanced prostate cancer. Palliative treatment helps to relieve symptoms associated with advanced prostate cancer.

Tell me something I don't already know. It's an understatement that I'm a crumb begging loser. Any open positions with Abbott? Would love to be on a winning team for a change.

Well, sorry, we don't take reps with CC diplomas or Phoenix 'degrees'. Best of luck!

 [Re: Abbott gets 6 Month Lupron Approval](#)

How much business opportunity will be lost since Lupron came out "first"? Opinions?

 [Re: Abbott gets 6 Month Lupron Approval](#)

When was the last time a Watson product was back ordered? Lately, I've been ordered to get out of Physician's offices and never come back, but never back ordered. Some of the gals have been ordered to get on their backs if they want a small Trelstar order.

Lunches do not qualify for the gravy train. This is, once again, why we can't and won't ever make our numbers. Look at the back pocket of those docs you are feeding gourmet food too. Is it your money that is lining their pockets?

 [Re: Abbott gets 6 Month Lupron Approval](#)

The 6 Month dosaged of Lupron will KILL patients. That's the real story here. Then finally the FDA will wake up and take Lupron off the market. It's being illegally marketed AGAIN for IVF, and Abbott made the Wall Street Journal three times in one week (December 2010) for illegal marketing of stents and drugs. When will the corruption finally end? It's widely acknowledged that Lupron isn't a cure for anything, and does more harm than good.
